

Infusion Devices and Associated Products and Services

North of England
Commercial Procurement Collaborative

Contract duration: 01/06/2017–31/05/2021

Background to contract

The objectives of this framework are to:

- Deliver sustainable savings to the NHS
- Provide an efficient and effective route to conduct business for both Trusts and suppliers
- Offer a “one stop shop” for all Infusion Device needs that fall into scope of this specification
- Provide a compliant route to market for Trusts

Framework

The scope of this Framework will be to enable Trusts to procure infusion devices in one or a number of categories, namely:

- Syringe Drivers
- Volumetric Pumps
- Dual Pumps
- TCI (including PK)
- PCA
- Ambulatory
- Epidural
- Docking Stations

Benefits

- Value for money
- Offers Trusts a ‘one-stop-shop’
- Cost saving opportunities

- Enhance operational control and efficiency
- Save time and effort required for tendering any of the products under this Agreement
- Provide a fully EU compliant Framework
- Consistent Terms & Conditions of contract
- Suite of template documents to support further competitions.
