

# Health Informatics and Clinical Benchmarking Systems

Contract duration: 08/08/2014–31/07/2018

North of England  
Commercial Procurement Collaborative

## Background to contract

This framework agreement covers the four most commonly purchased functionality modules within the Health Informatics and Clinical Benchmarking category:

- Clinical Quality Benchmarking Tool – including mortality benchmarking
- Clinical Efficiency Benchmarking Tool
- Clinical Referrals & Market Analysis Tool
- Clinician Performance Benchmarking Tool

All suppliers offer all of the above functionality modules. Trusts may purchase any combination of functionality modules that includes the Clinical Quality Benchmarking Tool.

## Benefits for your trust

- Mortality Benchmarking includes Summary Hospital-level Mortality Indicator (SHMI) and Hospital Standardised Mortality Ratio (HSMR)
- All suppliers hold NHS Information Governance Toolkit Level 2 Version 11 or higher
- Clear pricing for multiple options
- Some suppliers offer innovative additional functionality such as Care Quality Commission tracking
- Considerable savings of tens of thousands of pounds per year possible depending on functionality combination.

## Suppliers

- CHKS
- Dendrite Clinical Systems
- Methods Analytics
- University Hospitals Birmingham NHS Foundation Trust
