

Endoscopy Consumables

Contract duration: 01/07/2015–30/06/2018

North of England
Commercial Procurement Collaborative

Background to contract

It was intended that the new framework would be put in place for the end of the old framework.

The previous framework it was felt had worked very well and a substantial number of trusts had accessed the agreement.

It was thought when developing the new framework that the product range should be extended, that the framework should drive best value and encourage the take up of this framework via all members to aggregate spend with suppliers and drive down pricing.

Benefits to trust

Compliance – an OJEU compliant framework.

Value for money – via published framework pricing allowing for direct award and the opportunity to mini comp for more detailed customer requirements.

Ability to run a further competition – through the framework to assist with the rationalisation and standardisation of products.

Competent suppliers – suppliers who have gone through rigorous OJEU tender process and have demonstrated the capacity and capability to supply.

Continuous improvement – through Key Performance Indicators (KPIs).

Offers trusts a 'one stop shop' – trusts ultimately have access to all suppliers on the framework who have the capability to supply the products and services they require and can take advantage of this at any time during the life of the framework agreement.

Contract management – on-going central support of framework will be provided to all involved stakeholders throughout the life of this contract.

Opus Capita access – all products and consumables related to the framework are available via Opus Capita.

Appointed suppliers

- Amity Limited
