

Point of Care Testing Equipment and Consumables

Contract duration: 01/04/2015–31/03/2018
(plus option to extend by 1 x 12 months)

North of England
Commercial Procurement Collaborative

Background to contract

NOE CPC has implemented this contract with the purpose of offering a “one stop shop” for all point of care testing needs to its members. The framework enables different procurement routes (capital procurement, reagent rental and managed equipment service) and has the options of direct call-off or further competition enabling complete flexibility to members.

This framework has the leading market suppliers in this field and is proactively managing relationships to enable trusts to get the most out of their contracts.

Benefits

- A “one stop shop” solution for all point of care testing requirements
- Opportunity for additional savings over and above through further competition
- Market testing
- Zero commitment (except for further competition)
- Provides a fully EU compliant framework
- Consistent terms and conditions of contract
- Suite of template documents to support further competition.
