

# Surgical Mesh and Associated Consumables

**Contract duration: 06/10/2014–05/10/2017  
(plus option to extend by 12 months)**

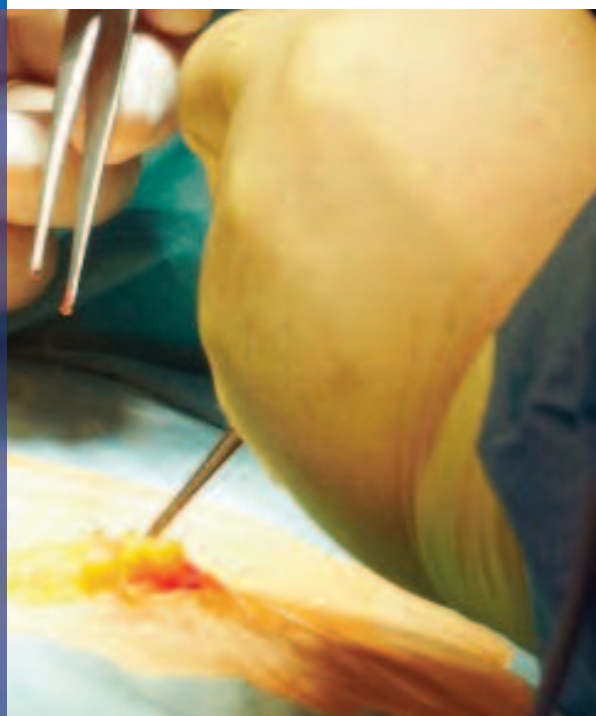

North of England  
Commercial Procurement Collaborative

## Background to contract

NOE CPC had previously put in place a framework for surgical mesh which has since expired. Due to the popularity and benefits of the previous contract it was felt that a new framework should be facilitated.

All key items are covered and all of the market leading suppliers have been awarded onto the framework. NOE CPC is now pro-actively managing the contract between stakeholders and suppliers.

The overall key requirement has been to establish a flexible, inclusive and responsive framework contract to provide solutions that address and support the surgical mesh needs of NOE CPC member Trusts and their patients. A cost effective, quality driven service with increased productivity were central elements identified by a trust's needs analysis.
