

Healthcare Transport Services

North of England
Commercial Procurement Collaborative

Contract duration: 01/05/2016–30/04/2020

Background to contract

We have responded to requests from our member organisations to put in place a framework agreement that is capable of meeting a number of healthcare transport requirements.

The resulting multi-lot framework agreement provides a compliant vehicle to access high quality, qualified providers to undertake further competitions for these services.

Benefits

Trusts can be assured that providers to the framework have been checked as high quality providers, whose vehicles and staff meet the high standards required by the specification.

Undertaking a further competition under the framework will save trusts time as they do not have to undertake their own full procurement exercises in order to put in place a compliant solution to their transport requirements.

Pricing structure

Prices will be ascertained as part of each trust's individual further competition.

Lots included

- Lot 1:** Patient Transport Services with Clinical Support
- Lot 2:** Patient Transport Services without Clinical Support
- Lot 3:** Transport Services (non-patient) for Healthcare Organisations
- Lot 4:** Temperature Controlled Transport Services for Healthcare Organisations
