

Topical Negative Pressure Devices and Related Consumables

North of England
Commercial Procurement Collaborative

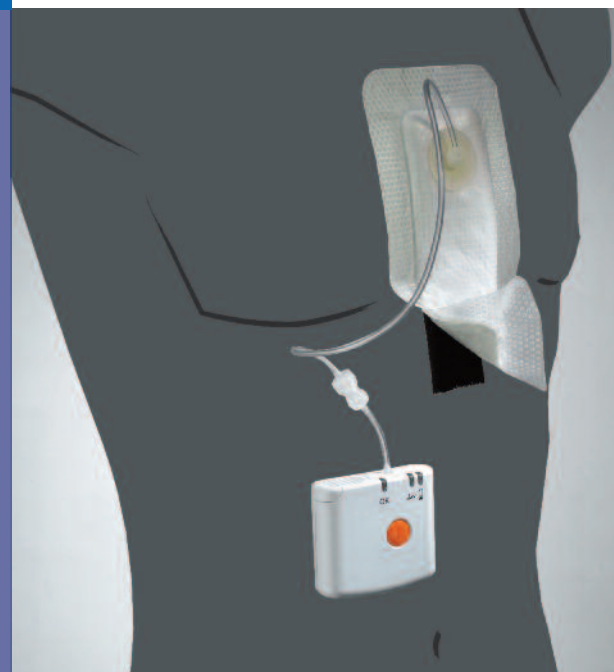

Contract duration: 01/03/2017–28/02/2021

Background to contract

Topical Negative Pressure (TNP) is an effective and widely used wound therapy/treatment option.

This framework agreement has been procured – taking into account the views of stakeholders – with a deliberate aim of expanding the scope to include the latest TNP devices available as demonstrated by the lot structure:

- **Lot 1** Large devices
- **Lot 2** Portable devices
- **Lot 3** Single patient use devices
- **Lot 4** Wound irrigation systems
- **Lot 5** Consumables

A full OJEU procurement exercise was concluded in early 2017. The resulting framework agreement is fully compliant with all EU procurement regulations and all other relevant legislation.

Benefits for your trust/organisation

- The lot-based structure above allows a fully compliant commercial route to a range of topical negative pressure devices, wound irrigation systems and all related consumables
- Options to buy or rent machines
- Wide range of machines available via the appointed suppliers
- All machines comply with all relevant standards

- Ability to select supplier/machine based on clinical/patient need and benchmarking (please contact NOE CPC for details)
- Potential for savings against “standard” pricing
- Potential for additional savings via volume breaks based on cumulative spend (so all framework users’ benefit)
- Ongoing support and advice from NOE CPC throughout the life of the framework agreement.

Appointed suppliers

- Aspen Medical Europe Ltd
- ConvaTec Ltd
- Iskus Health UK Ltd
- KCI Medical Ltd
- NEXA Medical Ltd
- T J Smith and Nephew Ltd
- Talley Group Ltd

Pricing structure

Prices are fixed for the first two years of the framework agreement (to 28 February 2019).

Discussions will take place with appointed suppliers towards the end of 2018 around rates from March 2019 onwards.
